RE: ML 46495--Building Stone/Limestone  
S/049/026 Utah County

Gentlemen:

The Administration has concluded that a cultural resources survey will be required of the lands which you intend to mine or disturb under the above numbered lease. I am enclosing a list of qualified consultants with whom you may contract to perform the survey. Please provide a copy of the survey to this office prior to commencing any mining operations upon the lands.

I have not yet received a surety bond for your proposed operations, as requested in my letter of May 24th. Please contact me if you need the names of some surety bonding companies. The requirement for bonding is at the rate of \$5,000 per acre of surface disturbance. If you can reduce the amount of continuous surface disturbance in your proposed operations then your bond amount may be reduced accordingly.

Please contact me if you have any questions in these matters or if I may be of assistance in helping you to meet these requirements. In the event you have decided not to go forward with this project then please notify me so that I may update your lease file.

Sincerely,

JOHN T. BLAKE  
MINERAL RESOURCES SPECIALIST
